**Basketball hoops** should be **10' high** if it overhangs the driveway.

**2 Cars: Preferred Parking:**  
If two cars are in the driveway they should be parked side by side close to the garage.

**2 Cars: Alternative Parking:**  
Pull up cars as close to each other as possible and make sure they are all the way to one side.

**Trees** hanging over the driveway should be trimmed up **12'** as heavy wet snow will push branches down even lower.

If a car must be parked in the driveway, park all the way to one side leaving at least **9 feet** of open space next to the car.

**DO NOT** park a car **near the end** of the driveway. This results in an area of driveway in front of the car we can't clear.

# ...CONTINUED

**DO NOT** leave **newspapers** in your driveway. Frozen newspapers left in driveways will get sucked into the blowers and cause damage.

Place your trash off to the side of the driveway so your whole driveway can be cleared.

Notify us if you have an **irrigation system** so we can make a note on your account to avoid damage to any sprinkler heads.

Check for **manhole covers** and **water shut offs**. If these are in your driveway they must be flush or below grade. They **CANNOT** stick up even 1/4".

**DO NOT** run **extension cords** or **hoses** on your driveway. These will get tangled in our machines and cause damage and down time.
